FOR IMMEDIATE RELEASE

International Electronics, Inc. Introduces the Max 3 Access Control System

***Major Benefits Include Faster Communication, Easier
Installation, and More User Functionality***

CANTON, MA. February 20, 2007 – International Electronics, Inc. (IEI) (OTCBB: IEIB), a leading manufacturer of electronic access control solutions, today introduced the Max 3 access control system, the newest offering in the Secured Series product line.

The Max 3 system, along with the latest version of the Hub Manager Professional Software, offer improvements such as three-times faster communication and new tools such as System Dashboard, which allows users to lock and unlock system doors and view door status and event logs.

The Max 3 system communicates over a standard RS485 network as well as across a LAN or WAN using IEI's Secure Ethernet Gateway (SEG-M). The Max 3 system also can be ordered in convenient single door kits, which include software, power supplies for both system and lock hardware, and a proximity reader compatible with HID, AWID, Casi ProxLite, and xCeed id credential.

"The Max 3 system is a natural evolution of our Secured Series products," said John Waldstein, IEI President and CEO. "Our loyal customers who have used the HubMax II and MiniMax II systems in the past will appreciate the greater communications speed and system features that the Max 3 has to offer."

Primary features of the Max 3 and MiniMax 3 systems include:

- Controllers support both "in" and "out" readers connected directly to the module, with any reader using Wiegand format up to 39 bits.
- Sounder and LED are supported.
- Faster and reliable communications with import transaction logs taking a third the time as previous systems.
- New software features of the Hub Manager Professional software include System Dashboard, allowing greater flexibility to view door status or event logs.
- Panel diagnostics allow faster installation and improved troubleshooting, such as communication status and relay status on each module.

The Max 3 and MiniMax 3 systems are available immediately through most security distributors beginning February 16, 2007.

About International Electronics, Inc.

International Electronics, Inc. (IEI), an ISO9001:2000 certified manufacturer, designs, manufactures, markets and sells electronic access control equipment and browser-managed security platforms used in residential and commercial security systems and wireless access control and fleet management systems for industrial mobile asset applications. IEI's products include its Door-Gard™ and Secured Series™ access control lines, its LS line of integrated battery operated door locks, its eMerge™ browser-managed access and security management products and its line of PowerKey™ industrial access control and fleet management products. IEI markets its security management and access control products to leading distribution and electronic security installation companies, and its PowerKey™ products directly to material handling equipment users worldwide.
