DAY/NIGHT Vandal Resistant Dome

MLA2DN39

The Aigis MLA2DN39 Day/Night VariDome provides a sharp, clear picture in both lighted and dark viewing conditions. During the day a high resolution color picture is produced, at night the IR cut filter is automatically removed creating a highly sensitive, clear picture in dark conditions.

Along with the 1/4-inch day/night camera, this unit comes with an integrated 3.0 - 9.0mm vari-focal DC Auto-Iris lens and is prewired for quick installation. Its cast aluminum housing and polycarbonate dome allow it to withstand 120 lbs. of force. It can also be mounted directly onto a single gang electrical box and wired through the back or via a standard 3/4-inch conduit opening found on the side of the housing.
