

Out with the old...in with the new.

dmc retrofit

The Next Generation Intercom Replacement Solution
for M&S and NuTone 3, 4 and 6 Wire Systems.

M&S Systems is excited to announce the availability of the new dmc retrofit system. This system is designed to replace many existing 3 & 4 wire intercom systems from M&S and NuTone. The dmc retrofit uses the existing wiring and, in most cases, fits into existing wall cutouts with no drywall repair required. The dmc also offers an optional 6-disc CD changer for whole house audio, a new stylish look and easy installation.
